

Meeting time and place:**Science Seminar:** 4:00 ó 4:50 PM, Thursdays, Powell Hall Auditorium**Class Meeting:** 5:00 ó 6:50 PM, Thursdays, BSC 1202*Instructor:* Dr. Gretchen Bielmyer*Office:* BSC 1097*Phone:* 333-5766*Email:* gkbielmyer@valdosta.edu

General course description: This course involves discussion and analysis of current topics in biology. Educational outcomes associated with this course include numbers 1 and 2 as specified by the VSU Biology Department for its Master's program, and general outcomes numbers 3, 4, 5, and 7 as specified by the University.

Completion of the course requires the following:

1. Attendance at the Science Seminar: Mandatory for all speakers hosted by the Biology Department. While optional, it is expected that you will attend at least half of the talks hosted by other departments.

2. Discussion Leader: Class meeting times will be devoted to discussion of current topics in biology. Each student will lead the discussion once during the semester. The topic for discussion is up to you, but there can be no duplication. Topics will be assigned on a first-come, first-served basis. Thus, if you have a topic you would really like to discuss, be sure to request it early. During weeks in which Biology is hosting a seminar speaker, you should find papers and focus the

In order to initiate discussion, you must provide 2-3 readings from the primary literature one week before your presentation (i.e., the readings should be ready for distribution during the class meeting prior to the one you will lead). Seminars should encourage free-flowing debate, so no formal (i.e., Powerpoint) presentation is required. You should also avoid re-reading the papers during class. Everyone in the class should have read the papers, so the goal is to critically evaluate the issues these papers raise. Thus, your main focus should be to provide an outline of key points, strengths and weaknesses in each paper, and other points for discussion.

3. Presentations: Each student will present a 20-25 minute research or related topic seminar, using power point. Students should be prepared for questions and constructive critiques from the instructor and fellow students.

4. Participation: As already stated, seminars are about discussion. Thus, it is critical that each of you actively participate. Consequently, a portion of your grade will be based on your

Grading: Grades will be based on a total of 300 points as described below. In addition, you need to be aware that there is a punitive attendance policy. The seminar requires active participation by all of you. So, if you are not here, the class will suffer dramatically. Consequently, for each unexcused absence, you will lose one letter grade off your final grade.

1. Discussion Leader	100 points
2. Presentation	100 points
3. General participation:	100 points
<hr/>	
Total	300 points

Evaluating the above is admittedly subjective. I will start the seminar assuming everyone has an A. As
